PROFESSIONAL SUMMARY

Computer Science student at VIT Bhopal with hands-on experience in AI/ML, cloud technologies, and full-stack development, including building an AI-powered insurance mobile application during an industry internship. Strong problem-solving skills, with a keen interest in building efficient, scalable, and data-driven solutions.

EDUCATION

VIT Bhopal University

Bachelor of Technology in Computer Science

Expected Graduation: 2027

CGPA: 8.24/10

EXPERIENCE

Software Development Intern

May 4 – June 22, 2026

Hyundai India Insurance Broking Pvt. Ltd.

- Collaborated with the development team to build Safe Orbit, a cross-platform insurance mobile application using Flutter.
- Developed and integrated application features while contributing across the software development lifecycle.
- Participated in requirement analysis, testing, debugging, and technical documentation, including Business Requirement Documents (BRDs).
- Worked closely with cross-functional teams to deliver a functional, user-focused mobile application.

Google Cloud Generative AI Intern

November 2025 – January 2026

Smart Bridge & Smart Internz

- Completed comprehensive virtual internship program focused on Google Cloud Generative AI technologies.
- Successfully learned and applied generative AI concepts with high efficiency in practical implementations].
- Demonstrated proficiency in leveraging Google Cloud AI services and tools for real-world applications.

PROJECTS

Safe Orbit – AI-Powered Insurance Mobile Application

Tech Stack: Flutter, Node.js, Express.js, PostgreSQL, MongoDB, Prisma, AWS, REST APIs

- Developed a cross-platform insurance mobile application using Flutter.
- Built and integrated REST APIs with Node.js, Express.js, PostgreSQL, and MongoDB.
- Implemented secure authentication, cloud storage, push notifications, and AI-powered document processing using AWS services.
- Collaborated with a cross-functional team to develop, test, and deploy the application.

Customer Relationship Management (CRM) Application

- Developed a desktop-based CRM application using Java Swing for managing customer data, interactions, and sales pipelines.
- Implemented CRUD operations with a MySQL backend, enabling efficient storage and retrieval of customer records.
- Designed an intuitive GUI with tabbed navigation, search/filter functionality, and report generation features.

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, C++, SQL

Machine Learning & AI: Pandas, NumPy

Web Technologies: React, Node.js, HTML, CSS

Cloud & Tools: AWS, Git

Databases: MySQL

CERTIFICATIONS

- Google IT Support Certificate
- Oracle: Cloud Infrastructure Generative AI Professional
- AWS Certified AI Practitioner
- AWS Certified Cloud Practitioner
